South Australia consultations

Seeking views of all organic operators

Have your say on the future of the organic industry

Policy Partners Pty Ltd is conducting regional consultations, seeking the views of organic operators about the future leadership of their industry.

The consultations are part of a project initiated by organic industry leaders from across Australia who are collaborating with a view to establishing a harmonised national voice for all organic producers, certifiers and the supply chain.

Tony Webster, Managing Director at Policy Partners, said "There are many organic products produced in South Australia. This workshop is a great opportunity for those involved to express their priorities for the future of the industry."

Mr Webster said "The Australian organic industry is diverse in its products and scale, ranging from small growers selling entirely through farmers markets, through to corporates exporting to the world. We welcome all people in the industry to come and share their views about strategies for ensuring the industry is well represented and to help shape Australia's organic industry."

The 3-hour consultation workshop will be held at The Haus in Hahndorf at 2.00pm Tuesday 3rd October.

Policy Partners has published an Issues Paper to guide the consultations. For further information, visit the project website at www.organicindustries.com.au

RSVP is required for catering purposes. Please email enquiries@organicindustries.com.au or phone/text Tony Webster on 0448439334 to register.

Consultation Workshop

Organic Industries of Australia
